

Babcock Power Inc.

CAMS Features

- (4) Units pre-wired/pre-piped in NEMA 4 enclosures w/:
 - ✓ Mass flow transmitter
 - temperature compensated via 3-point thermocouple
 - static pressure compensated
 - 4-20 mA output signals for OFA mass flow, and absolute pressure
 - ✓ Auto purge system
 - solenoid valves & timers for purge sequence
 - 24 purge cycles per day
 - ✓ Supply requirements
 - 110 VAC
 - compressed air 80-120 psig @ 100 cfm (dry, oil-free)
- (4) external temperature transmitters (4-20 mA output)
